

LLumar® Exterior Window Film Exterior Silver (RHE20 SI ERHPR)

Property Type:
Residential (Landed)

Location:
Sentosa Cove, Singapore

Provide Excellent Heat Rejection Performance

There are numerous prestigious address we have worked on. Some owners have huge overhead skylights like this one at Sentosa Cove. The coverage area of the skylight is three quarters the size of a basketball court, exposure to such daylight will create the greenhouse effect.

Daylight cause unpleasant heat to be trapped within people's living quarters.

We recommended LLumar specialty film, RHE20 exterior film. Such film is specialized to withstand the outdoor elements and the owner can enjoy the pleasant effects of daylight without the negative effects of the solar heat.
